PRESS RELEASE

Paris, January 9, 2024

To celebrate its 12th anniversary, Free Mobile is including the TV OQEE by Free app in its 5G Free Mobile Plan

Free Mobile has just passed the milestone of 15 million subscribers, and today it's celebrating its twelfth anniversary. To mark this occasion, subscribers on the 5G Free Mobile Plan (€19.99/month) can now access the broad range of content offered through OQEE by Free on their smartphone, tablet, smart TV, TV box and on oqee.tv. Free is the first operator to include all-screen TV access in a Mobile plan at no extra cost in Metropolitan France.

OQEE gives subscribers **access to over 220 TV channels at no extra cost**, including DTT channels, as well as a multitude of catch-up services. It also offers advanced features such as live pause and rewind, start over and resume watching.

And to make their viewing experience even better, subscribers' plans also give them unlimited access, at no extra cost, to **OQEE Ciné**, Free's video-on-demand service. OQEE Ciné offers a content-rich, varied catalog of **over 500 movies and series** available at any time and on all screens.

The **new content offered to kick off 2024** includes *White House Down, Fanfan la Tulipe, Scary Movie, Close Encounters of the Third Kind, The Angry Birds Movie, Taxi Driver,* and a selection of stand-up comedy shows, starting with *Malik Bentalha.*

All Free Mobile subscribers with a Freebox subscription that includes the TV service already have the TV OQEE by Free app and just need their Freebox passcodes to log on to it.

OQEE by Free is available as from today for both current and new 5G Free Mobile Plan subscribers.

The 5G Free Mobile Plan: ever-more services included at no extra cost

The addition of the TV OQEE by Free app in the 5G Free Mobile Plan is in line with **Free's strategy** of constantly adding new services to the plan without putting its price up.

Since the Free Mobile Plan was first launched in 2012, Free has:

- **multiplied the plan's data allowance** in Metropolitan France **by more than 80;**
- **increased the number of destinations included for calls to landlines from Metropolitan France from 40 to 100;**
- **improved its quality of service by including 4G, then 5G, and by offering** VoLTE and Wi-Fi (VoWi-Fi) calling;
- **included 35 GB of 4G data in 100 destinations** outside France;
- **added new services included** in the plan**,** such as **the Free Ligue 1 app and today the TV OQEE by Free app**.

and all that **without changing the plan's price**!

In January 2022, Free made a promise **not to touch the prices of its two Mobile plans** (€19.99/month and €2/month)[1] until **2027**.

Free Mobile has passed the milestone of 15 million Mobile subscribers

On its 12th anniversary, Free Mobile is delighted to announce that it has earned the trust of **more than 15 million Mobile subscribers**.

We've changed a lot over the past 12 years, but **we've stuck firmly to our values: liberty, simplicity, generosity and transparency,** with the aim of **giving as many people as possible the best access to connectivity at the best price.**

Free Mobile is **France's leading 5G operator** in terms of number of 5G sites[2] and has **population coverage rates** of **94.5% for 5G** and **over 99% for 4G.**

About Free

Free – the inventor of the world's first triple-play box – is a Fixed and Mobile Ultra-Fast Broadband operator in France, standing out for its innovative, straightforward and attractive offerings. At end-September 2023 it had 21.6 million retail subscribers (14.4 million Mobile subscribers and 7.2 million Fixed-line subscribers). Free is a subsidiary of the iliad Group, which was created in France in the early 1990s and now also operates in Italy under the iliad brand and in Poland under the Play brand. And in March 2021, the iliad Group launched its BtoB business in France under the Free Pro brand.
