JOIN THE ECOSYSTEM

recherche.data.gouv.*fr*

Recherche Data Gouv federates institutional and thematic data repositories and the support systems for research teams throughout the territory.

Recherche Data Gouv is a flagship project included in the strategies of the Ministry of Higher Education and Research

CREATING
an institutional space

Any higher education or research institution can request the creation of an institutional space where it can deposit and publish its research data. Each institution is responsible for managing its own space and curating the data sets deposited in that space.

The second national plan for open science (2021-2024)

BECOMING
a data management cluster

The development of local systems which federate skills is encouraged in the framework of «data management clusters» calls for expressions of interest in providing support for research teams in managing, structuring and disseminating their data.

Data policy, algorithms and source codes (2021-2024)

The development of the repository and the catalog has been entrusted to INRAE, which was joined by 7 other establishments

An ecosystem for sharing and opening research data

FEDERATE, SUPPORT, SHARE, OPEN, REUSE

@RechercheDataGv

AT A GLANCE

Research is facing a major challenge: **preserving, sharing and opening up data to promote open, more transparent and cumulative science** for everyone, from research teams to society as a whole.

Handling research data is a critical issue for researchers, as well as an additional and complex workload.

Research data are still an underutilised asset, and worse, **such data are all too often lost or simply unusable.** Recherche Data Gouv was created to help research teams manage their data and make it FAIR: Findable, Accessible, Interoperable, and Reusable.

Every contributor to the Recherche Data Gouv ecosystem helps **extend the reach of French research** by sharing and opening access to data.
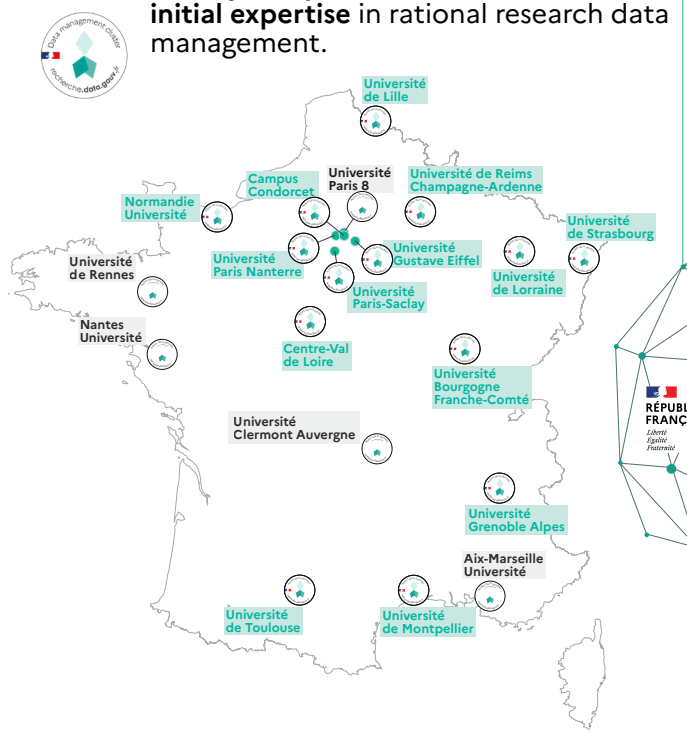

Recherche Data Gouv aims to **become a European Open Science Cloud (EOSC) service,** offering access to shared and open research data to support reuse.

AN ECOSYSTEM FOR SHARING AND OPENING RESEARCH DATA

Recherche Data Gouv **is an unique ecosystem,** composed of women and men who decided to pool their expertise, **to support research teams.**

19 DATA MANAGEMENT CLUSTERS

geographically close to research teams so they can **provide researchers with initial expertise** in rational research data management.

Map of France with clusters:
- Université de Lille
- Campus Condorcet
- Université Paris 8
- Université de Reims Champagne-Ardenne
- Normandie Université
- Université de Strasbourg
- Université Paris Nanterre
- Université Gustave Eiffel
- Université de Rennes
- Université de Lorraine
- Université Paris-Saclay
- Nantes Université
- Centre-Val de Loire
- Université Bourgogne Franche-Comté
- Université Clermont Auvergne
- Université Grenoble Alpes
- Aix-Marseille Université
- Université de Toulouse
- Université de Montpellier

RÉPUBLIQUE FRANÇAISE
Liberté Égalité Fraternité
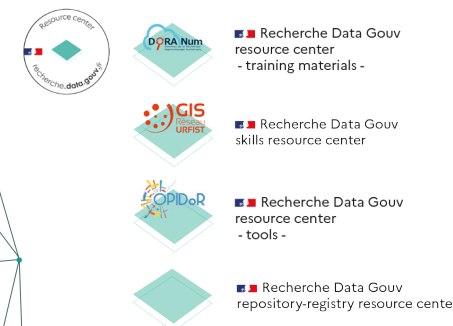

recherche.**data**.gouv.*fr*

4 INSTITUTIONAL REFERENCE CENTRES

have been offering **support specific to their research orientations** and for their research teams for several years, completing the ecosystem.

6 THEMATIC REFERENCE CENTERS

disseminate good practices and international standards **management, processing and dissemination of data in their respective scientific fields.** They thus complete and support data management clusters.

- PNDB — Pôle National de Données de Biodiversité
- IFB — INSTITUT FRANÇAIS DE BIOINFORMATIQUE
- PRO GE DO — DATA INFRASTRUCTURE
- Huma-Num[IR*]
- CDS — Centre de Données astronomiques de Strasbourg
- DATA TERRA

4 RESOURCES CENTERS

supplement local support with **online services and training.**

- DoRA-Num — Recherche Data Gouv resource center - training materials -
- GIS UReseau URFIST — Recherche Data Gouv skills resource center
- OPIDoR — Recherche Data Gouv resource center - tools -
- Recherche Data Gouv repository-registry resource center

1 MULTIDISCIPLINARY REPOSITORY

a **sovereign publication solution for sharing and opening data** to communities that do not yet have a recognised thematic repository.

1 REGISTRY

to **locate and report data** already shared or opened thanks to a French or international thematic repository.
