Creating an account and log-in

The repository allows you to authenticate in three different ways:

- with an institutional identifier
- with an ORCID identifier
- by creating an external account with a username/an e-mail address

ORCID (Open Researcher and Contributor ID): persistent, universal, neutral and independent “author” identifier. For more information: <https://orcid.org/>

Things to know before you authenticate!

Authenticating with your institutional identifier may be necessary to benefit from roles assigned in advance within your institutional space.

An e-mail address cannot be associated with several accounts.

It is impossible to synchronize several accounts, so it is recommended to have **only one account per user**.

During the 1st connection/registration:

- click on "Log In" for institutional identifiers or ORCID
- click on "Sign Up" for the use of an email

For more information on the form:

Some fields are pre-filled depending on the authentication mode.

Example of pre-filled fields with ORCID authentication:

General Terms of Use *

The recherche data.gov.fr repository is part of the French national federated data platform. L'enseignement Supérieur et de la Recherche Scientifique (ESRS) a mis en place un référentiel de données de la recherche (Dataverse). L'utilisation de ce référentiel de données de la recherche est soumise à la compliance with its terms of use.

☐ I have read and accept the Dataverse General Terms of Use as outlined above.

Creating an account and log-in

- with your institutional identifier
- with your ORCID identifier
- or by creating an account with a username/e-mail

Regardless of the authentication mode chosen, you will have a form in which you must accept the Dataverse General Terms of Use.

1. Authenticate with an institutional identifier

- Click on "Log in"
- In the "Your institution" section, select your organization from the drop-down list and click on "Continue"
- Enter your usual identifier
- You are connected! You now have access to your personal space.

2. Authenticate with an ORCID identifier

- Click on "Log in"
- In "Other options", click on "ORCID"
- Click on "Create or Connect your ORCID"
- Enter your ORCID identifier and your password then click on "Sign in"
- You are connected! You now have access to your personal space.

3. Creating an account with email / username

- Click on “Sign up”
- Fill in the form
- Choose a username and password
- The acceptance of the general terms of use is obligatory
- Then click on “Create Account”
- You are logged in to your new account! You now access to your personal space.

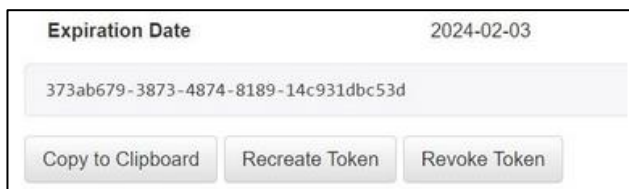

4. To log in with an account with email/username

- Click on “Log in”
- In “Other options”, click on “Username/email”
- Enter your username or email and your password
- Then click on “Log in”
- You are connected! You now have access to your personal space.

Personal space

- **My data:** display of collections (dataverses), datasets (datasets) and files created or on which you have a specific role.
- **Notifications:** alerts received when the account is set up, when a dataverse or dataset is published...
- **Account Information:** when an ORCID account is being used, you can check here if your affiliation has been correctly filled in.
- **API Token:** similar to a password, it allows you to authenticate with the Dataverse APIs* (the token is valid for one year).

Example:

The screenshot shows a user interface for managing an API token. It features a label 'Expiration Date' with the value '2024-02-03'. Below this is a text box containing the token string '373ab679-3873-4874-8189-14c931dbc53d'. At the bottom, there are three buttons: 'Copy to Clipboard', 'Recreate Token', and 'Revoke Token'.

*application allowing to modify, publish, load files without going through the interface.

- **Log out**
